

TIM HEYREND

My name is Tim Heyrend, and my family and I have lived in Highland for the last 14 years. As a professional civil engineer for the past 20 years, I am experienced with land development, the City budgeting process, road and utility projects, and project funding. Experience matters in these areas, and I will use my experience to maintain the City's roads and utilities while keeping fees low, and to plan new growth wisely in our community.

I have served Highland for the past four years as Vice Chair of the planning commission, where my focus remains to protect individual property rights, while supporting new developments that meet City standards.

I will preserve your property values by maintaining large lots and open space. Businesses are important to Highland to establish tax revenue and provide local jobs. I will encourage new businesses to come to Highland, and for us to shop locally. I firmly believe that excessive debt is a burden to our community, and will vote against any new unnecessary debt.

I support and use the library, parks and trails, and will listen to your concerns and work with you to find the best solutions for Highland. Please vote Tim Heyrend for Highland City Council.
