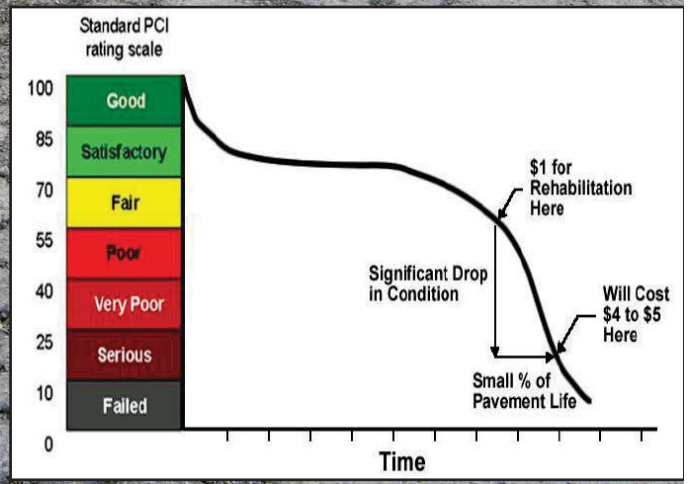
Transportation Existing Conditions


- In 2012, the Mayor and City Council formed the Transportation Committee (TC) to address road conditions in Highland
- The TC completed a Road Condition Inventory/Pavement Condition Index for each section of road in the City
- This study identified a need for approximately $600,000 per year for road maintenance plus $20 million ten years for capital road improvements
- Without repair/ improvements it is estimated the cost to repair the roads will be 4-5 times current costs
